## What is a Shaman?

A Shaman is one who develops a personal and intimate relationship with the unseen world for the purpose of being of service as a healer. This relationship is cultivated experientially through self-induced altered states of consciousness, ceremony, and refined energetic awareness.

Shamanism is not a religion. It is a spiritual practice grounded in a reverent awareness that the world is animated, conscious, and energetically interdependent. The shaman's task is to come into right relationship and reverent communion with the seen and unseen world so as to mediate between worlds on behalf of the community or individual.

## Who do I work with?

Most of my clients tend to be healers themselves (massage therapists, counselors, coaches, nurses, therapists, etc.) but I work with any adult who is at a spiritual crossroad needing help to illuminate their blind spot, release pain or gain clarity and direction.

All I ask is that you be open to the experience and willing to do your work. People don't find their way to me unless they are willing to go deep inside their hearts. It takes vulnerability and courage to make profound and lasting changes, and I don't work on the small stuff!

People are also often drawn to me because the paint-by-number approach of traditional counseling methods (whether it be psychiatry, the church or modern medicine) has failed them. They're left with unanswered questions, unexplained feelings and unresolved issues—with a sense that there exists an entire realm of reality left completely unexplored.

Whatever your issue, people who work with me understand that any change on the outside must begin with change on the inside.

## What can I help you with?

Whether it be uncertainty on life purpose, money issues, relationship questions, career changes, drawing boundaries, healing deep traumas, desiring to know yourself more fully, or anything that has you stuck or in pain, I can create a safe place of healing and trust where transformation can begin.

Through my own time spent in the crucible, I have become a master at navigating and illuminating the realm of emotions and energetic patterns. Using a vast array of psychological, shamanic and healing techniques, I am able to quickly cut through the fog of

confusion and stagnation to find the root of your issue and help you transform it.

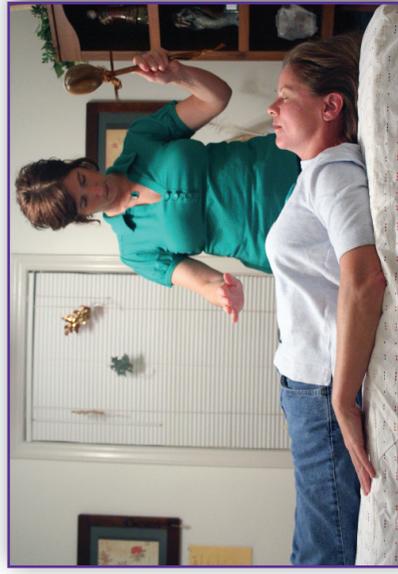

In addition to supporting your healing, I have created a wealth of tools and techniques to help the transformation stick and give you new habits to replace old ones. My approach is grounded in the fact that we live on this earth plane and must be able to function in form, not just spirit. Achieving "enlightenment" is not about bypassing the body and emotions; it is about fully embracing and inhabiting our body and emotions. That requires we do our spiritual work and look at the stuff that isn't always so pretty or comfortable or pleasant. It's OK; I won't judge you. In fact, I will show you how to love yourself—ALL of you. Spoiler alert—there's nothing wrong with you.

For spirit-driven entrepreneurs and business owners, I have developed a wide-variety of tools and programs to help you add to your toolbox of healing techniques, grow your practice, bust through your money blocks, and continue deepening on your path of growth and spiritual awakening. As one who serves, I know you understand the importance of continuing to do your own spiritual work, accessing more and deeper stores of wisdom, strength and knowledge to, in turn, bring more to the clients you serve.

## What can you expect when you work with me?

I work very intuitively, calling upon your highest guides and my highest guides to lead me toward the activities that will be most beneficial to you and get to the heart of the matter as quickly as possible. I create a sacred space of love and safety so that you may access the places of vulnerability necessary to create the healing and transformation you desire.

In our work together I will use a variety of techniques such as energy clearing, shamanic extractions or cord cuttings, counseling, past life recall, living ceremony, or guided visualization as well as follow-up assignments to assist in the integration of the work we complete in session. I am known to use some rather unconventional methods, so part of the excitement is seeing where spirit will lead us!
